

Bindu Kalyani Guntupalli

Chicago, IL | +1 8722260656 | bindukalyani.guntupalli@gmail.com | [GitHub](#) | [LinkedIn](#)

OBJECTIVE

Recent Information Technology graduate with hands-on software development experience, seeking a Software Engineer role to contribute to backend development using Java, Spring Boot, SQL, and Python, while continuously learning and adapting to new technologies.

EDUCATION

Northern Illinois University, IL, US - CGPA: 3.9/4

Jan 2024 - Dec 2025

Master of Science, Information Systems

Coursework: Python, SQL, R Programming Language, Applied Business Analytics (SAS), Business Data Vizualization, SAP ERP, System Analysis & Design, Digital Transformation Strategy, Network and Cyber Security, Project Management

Acharya Nagarjuna University, AP, India - CGPA: 7.01/10

Mar 2016 - Sep 2020

Bachelor of Engineering, Electrical and Electronics

Relevant Coursework : Power Systems, Differential Equations and Statistics , DC Machines, Problem Solving with C , Data Structures Using C++

TECHNICAL SKILLS

Languages and Frameworks: C, C++, Java, Python, SQL, R, Spring Boot, REST APIs

Frontend: React, JavaScript, HTML, CSS

Backend & Concurrency: Multithreaded Programming, Asynchronous Processing, Synchronization Methods (thread safety, locks, resource management)

Databases: MySQL, Oracle, PostgreSQL, NoSQL (MongoDB, DynamoDB), Microsoft Access

Distributed Systems & Data Processing: Batch Processing, Data Pipelines, Data Integration

Cloud & DevOps: Microsoft Azure, AWS, CI/CD Pipelines, Swagger, Jenkins, Postman

Version Control: Git, GitHub, GitLab, SVN

Software Engineering Practices: Object-Oriented Design, Data Structures & Algorithms, System Design, Technical Specifications, Design Documentation, Agile / SDLC

WORK EXPERIENCE

Software Engineer | Street Care | Chicago-IL, US

Feb 2026 - Present

- Collaborated with cross-functional teams to deliver new application features, translated user requirements into technical solutions, resulting in improved application functionality and enhanced user experience
- Identified the need for scalable and maintainable code structure, implemented clean coding practices and efficient logic, improving system performance and supporting faster feature enhancements
- Integrated front-end components with backend services and databases to streamline data flow, designed reliable API interactions, ensuring seamless functionality and consistent system reliability

Software Engineer | Tata Consultancy Services | Gachibowli-Hyderabad, India

April 2021 - Jan 2024

- Contributed across the full SDLC by analyzing requirements, developing and maintaining RESTful APIs using Java and Spring Boot, and supporting deployments, ensuring reliable backend functionality and smooth feature releases.
- Designed and integrated backend services with Elasticsearch, Oracle, and MySQL, enabling consistent data access across multiple environments and improving application scalability and performance
- Improved code quality and release reliability by performing static code analysis with SonarQube, conducting peer reviews, developing automated tests, and managing version control using Git/GitLab
- Automated CI/CD pipelines using Jenkins, monitored APIs with Swagger and Grafana, and resolved production issues through debugging and log analysis, ensuring high application availability and system stability
- Collaborated closely with QA, DevOps, and cross-functional stakeholders to coordinate releases and production support, reducing post-deployment issues and ensuring consistent application performance
- Optimized backend performance by analyzing application bottlenecks and refining database queries and API logic, improving response times and enhancing overall system efficiency

LEADERSHIP EXPERIENCE

Graduate Teaching Assistant | Northern Illinois University | Dekalb-Illinois, US.

August 2024 - May 2025

- Delivered instructional support in SQL, database design, and query optimization to 40+ graduate and undergraduate students, reinforcing practical application through structured tutorials and lab sessions
- Provided academic assistance through individual and group mentoring, contributing to a 25% average improvement in student performance on assignments and examinations
- Graded assignments, projects, and exams for 100+ submissions per semester, ensuring accurate evaluation and delivering constructive feedback that promoted continuous skill development

PROJECTS

Early Detection of Diabetes-Predictive Modeling

May 2025

- Built an end-to-end data processing and modeling pipeline, including data ingestion, preprocessing, and model execution using Python
- Implemented modular code for feature extraction, training, and evaluation, emphasizing reproducibility and maintainability
- Designed evaluation workflows and logging to validate model correctness and reliability across datasets

Employee Burnout Rate Estimation

December 2024

- Developed a structured data analysis pipeline combining statistical techniques and machine learning models to process large datasets
- Implemented regression and classification workflows with reusable components for feature selection, training, and evaluation
- Focused on translating analytical results into scalable, data-driven solutions through clean code and documentation

HONORS & AWARDS

- Special Initiative Award, Tata Consultancy Services (TCS)
- Phi Beta Gamma Honor Society, inducted for academic excellence
- Merit-Based Scholarship, awarded based on competitive performance in SAP TS410 Workshop Examination
